Updating Field-IQ and EZ-Pilot Firmware

Follow the steps below in the Precision IQ app to update the Field-IQ™ module firmware and EZ-Pilot™ firmware (for displays that support Field-IQ and EZ-Pilot):

1. Update the Precision-IQ settings to allow an update. From the Home screen, tap the **Settings** button.
2. On the Settings screen, tap **Application Control** and verify that **Enable Access to Installer Setup** under Implement Setup is set to **ON**.
3. Tap the Android **Back** button to return to the Home screen.
4. In the Activity Bar of the Precision-IQ Home screen, tap the **Diagnostic** icon.
5. On the Diagnostics screen, tap the **Performance** button.

EZ Pilot

1. Tap the row containing the module to be updated
2. If the SAM-200 motor requires updating the update will start automatically. The SAM-200 version is not selectable, Precision IQ will load the appropriate SAM-200 firmware based on the PIQ version.
To monitor the progress of the update swipe down on the information bar (top left corner).
3. If no update is required no update will start.

Field-IQ

1. Tap the row containing the module to be updated. For example, tap the row containing Field-IQ module information. Tap the **Update Module Firmware** pop-up button:

2. A pop-up window will appear that lists the available firmware versions. Tap the desired firmware version from the list to begin the upgrade.
3. A confirmation pop-up window appears. Tap **OK** to dismiss the window. The firmware will update in the background.

To monitor the progress of the update swipe down on the information bar (top left corner).

Caution!

Do not remove power to the system until the firmware update has successfully finished.

Tap the **Home** icon in the Activity Bar to return to the Home screen.
